

CLADDING PRO

SYSTEM

Apart from white, the CORTIZO cladding systems are available in a wide range of wood textures and colours in constant development.

The application of wood textures and colours is carried out by coating the base profile with a thermoweldable sheet, highly resistant to solar radiation, thus ensuring a perfect and long-lasting finish.

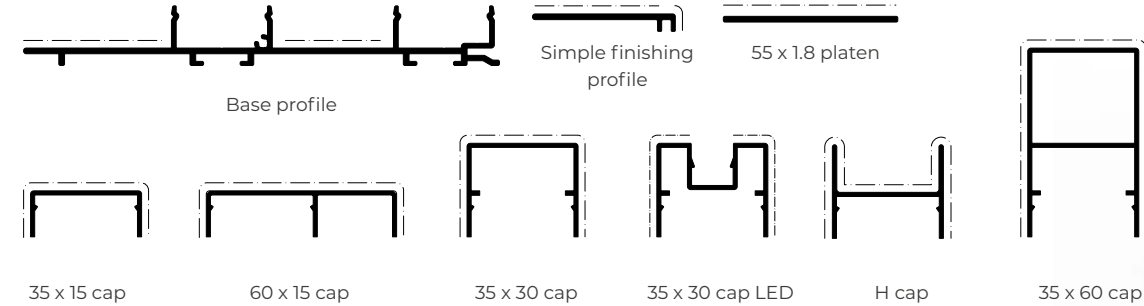

CLADDING PRO SYSTEM

Transform your building with Cladding Pro, the modular and versatile aluminium cladding system that adapts to the needs of any architectural project. Its innovative design with clipped profiles and straight caps of various dimensions provides a modern and minimalist aesthetic, while ensuring quick and easy installation.
